

TELE-CRITICAL CARE

TIMELY INTERVENTIONS FOR THE
HIGHEST-ACUITY PATIENTS

EQUUM
Medical
ACUTE CARE TELEHEALTH

CHALLENGE

Critical care often confronts bottlenecks in patient flow, as many patients wait for limited ICU beds. Studies find that half of the patients admitted to ICUs could have been cared for in more appropriate settings. Long waits for ICU beds lead to higher morbidity, mortality and costs.

SOLUTION

Equum provides episodic to round-the-clock coverage of ICUs through telehealth consults and management. We help standardize workflows and protocols and guide house staff and hospitalists through procedures. We expand critical care to the ED to ensure high-acuity patients get the right level of care, reducing adverse events and lengths of stay.

ABOUT US

Equum Medical uses telehealth to integrate clinical expertise, data analytics, innovative technologies and transformational processes to deliver the most cost-effective care to high-acuity patients when they need it, wherever they are.

RESULTS

\$632

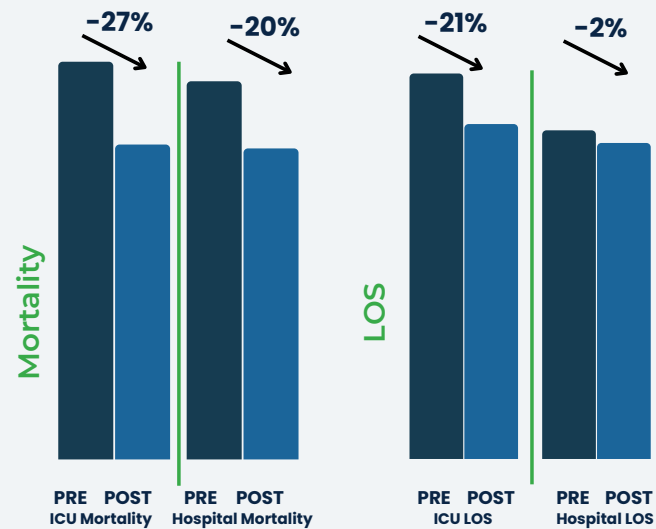

Increase in contribution margin/ICU Case

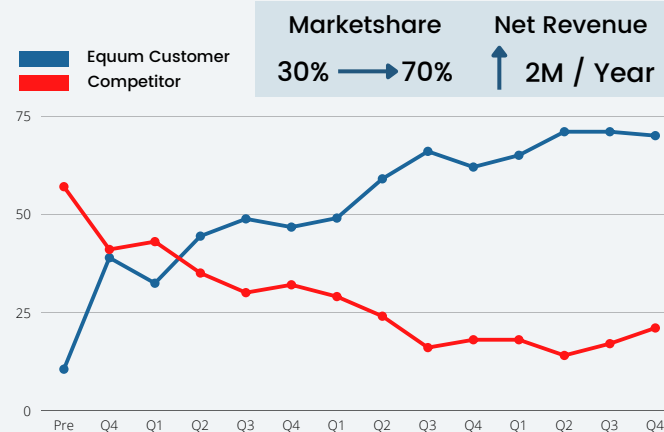

50%

Increase in retained ICU cases

REDUCED MORTALITY & LOS

Improved Transfer Case Volumes and Reduced System Leakage
