

# TELE-TRANSFER

ENSURING PATIENT FLOW IS SMOOTH  
AND IN THE RIGHT DIRECTION

## CHALLENGE

Lack of staffing and available expertise at critical junctures in a patient's journey cause delays in transfers and care being delivered in suboptimal settings. This increases length of stay, mortality and morbidity while decreasing patient and clinician satisfaction.

## SOLUTION

Using tele-visits, our world-class clinicians add support at points of care transition to assess what care is needed, where and when. Some patients, who are outside of the ICU, need critical care support regardless of where they are located. Quick access to specialty care helps keep patients local, improving both volume and load balancing.

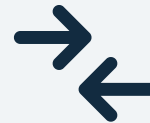

## ABOUT US

Equum Medical uses telehealth to integrate clinical expertise, data analytics, innovative technologies and transformational processes to deliver the most cost-effective care to high-acuity patients when they need it, wherever they are.

## RESULTS

### Global Transfer Volume

Equum generated over 108% increase in transfer volume for a customer over a two year period

**108%**

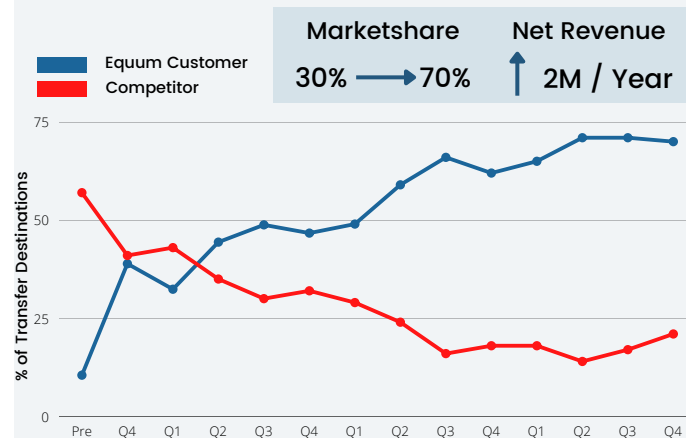

### Time to Acceptance

Equum clients reduced their time to acceptance by 52% in one year

**52%**

### Improved Transfer Case Volumes and Reduced System Leakage
