

VIRTUAL SITTER

CHALLENGE

The national nursing shortage and the shift to value-based care have made the use of nursing assistants as patient sitters financially and clinically unsupportable. There is no reliable clinical evidence that one-to-one sitters stop patient harms such as falls with injury or elopement, but many hospitals continue to use them because they are unaware of alternatives.

SOLUTION

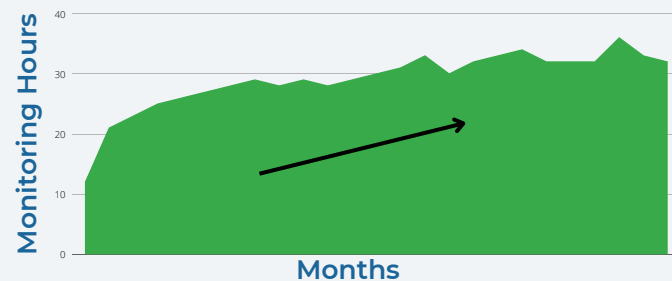

Today's technology allows remotely based monitoring staff to watch a dozen or more patients simultaneously via video and intervene using digital audio. Equum will provide highly trained staff working from our new Virtual Care Collaboration Center. The Equum ecosystem of technology partners can provide the cameras and audio, or we can use a hospital's legacy devices.

ABOUT US

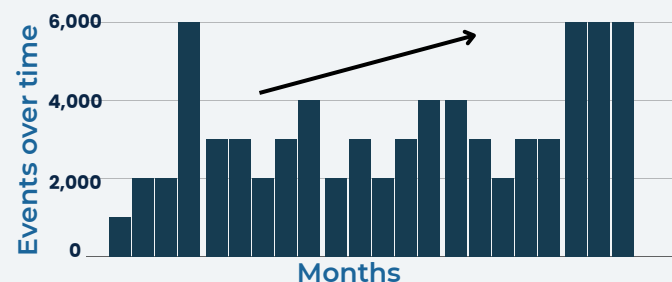

Equum Medical uses telehealth to integrate clinical expertise, data analytics, innovative technologies and transformational processes to deliver the most cost-effective care to high-acuity patients when they need it, wherever they are.

RESULTS

AVERAGE ANNUAL HOURS:
81,000
ESTIMATED ANNUAL SAVINGS
VS. 1:1 BEDSIDE STAFFING:
~ \$1.2M

TOTAL EVENTS PREVENTED
