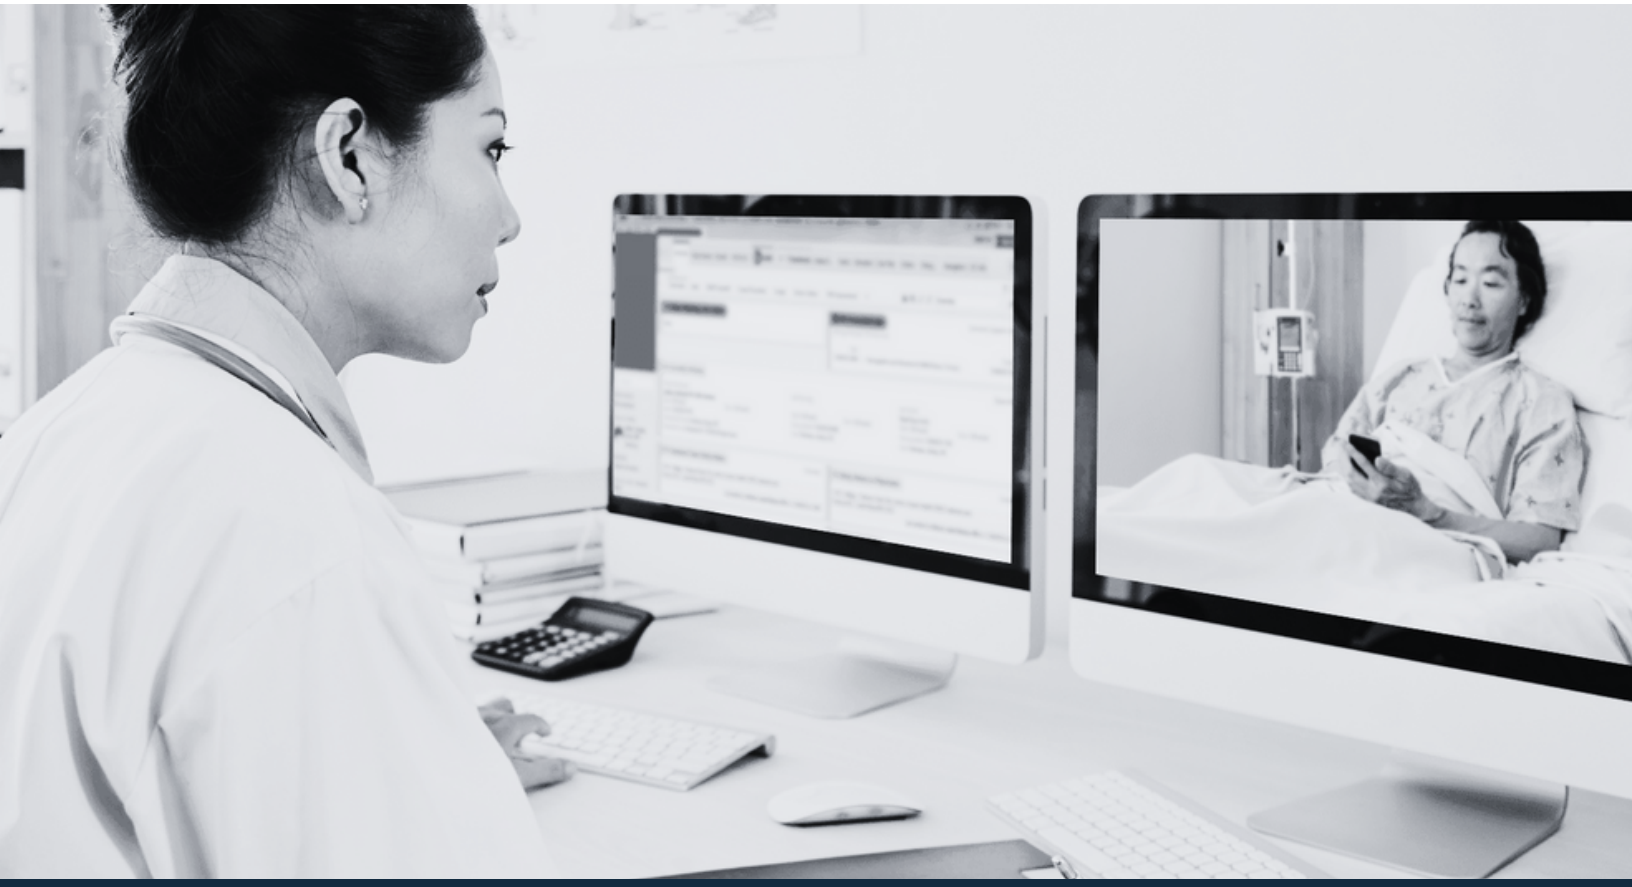
ADDRESSING HOSPITAL CHALLENGES

Hospitals face an array of challenges that threaten the quality and accessibility of patient care. Chief among these are the scarcity of healthcare professionals and the rising demand for specialized inpatient care for complex, high-acuity conditions. This has placed an unprecedented strain on traditional hospitalist models, often resulting in overextended staff, delayed patient admissions and discharges, increased length of stay, and, ultimately, compromised patient outcomes and satisfaction.

The "**Labordemic**," characterized by a significant healthcare workforce shortage exacerbated by the COVID-19 pandemic, has further highlighted the urgent need for innovative solutions to bridge the gap between patient needs and hospital resources. Hospitals are in dire need of a flexible, efficient approach to ensure continuous, high-quality care — a solution that Equum Medical's Tele-Hospitalist Program promises to deliver.

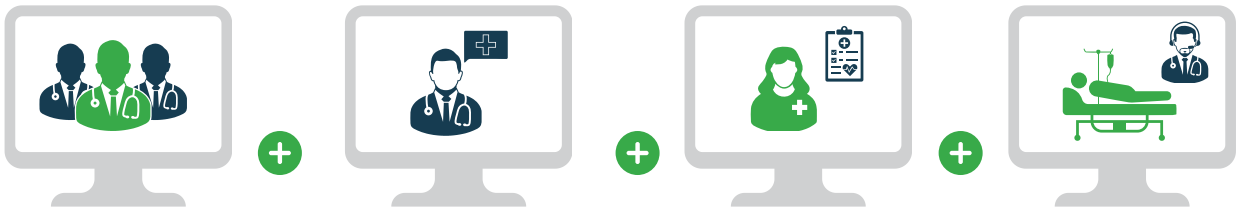


INTRODUCING EQUUM MEDICAL'S TELE-HOSPITALIST PROGRAM

Equum Medical's comprehensive Tele-Hospitalist Program is designed to supplement and enhance the capabilities of hospitals across the nation, ensuring that every patient receives timely, specialized care, irrespective of location. By integrating Virtual Nursing, Virtual Sitter, and Virtual Inpatient Telemetry services, we offer a holistic approach to inpatient care that optimizes staffing, maintains patient safety, and supports nurse well-being.

What Tele-Hospitalists Bring to the Table

Equum Medical's Tele-Hospitalists are board-certified or board-eligible in internal medicine, bringing a wealth of experience and expertise to manage all aspects of inpatient care. They offer:



Take Floor and ED Calls | Admit, Discharge, and Round | Physician Examinations | Exceptional Bedside Care

- **24/7 On-Demand Access:** Immediate, round-the-clock hospitalist care to manage emergencies, admissions, and critical care needs.
- **Night Shift and On-Call Support:** Ensuring continuous coverage and alleviating the burden on existing hospital staff.
- **Comprehensive Care Management:** From diagnostics to treatment plans, our tele-hospitalists coordinate all facets of patient care, closely collaborating with on-site clinical teams and specialists.
- **Operational and Cost Efficiency:** Implementing a Tele-Hospitalist program can reduce the reliance on locum tenens and the costs associated with traditional staffing models, while improving patient throughput and reducing the length of stay.

THE EQUUM MEDICAL ADVANTAGE

Our Tele-Hospitalist Program is not just a service but a partnership aimed at transforming the way hospitals deliver care.

Equum's Tele-Hospitalist Services

The Advantages Include:

- **Enhanced Patient and Staff Satisfaction:** By implementing strategies to address on-site staff burnout and improve access to specialized care, we aim to positively influence the overall care experience for patients and staff.
- **Improved Financial Performance:** 24/7 availability of digitally enabled hospitalist resources can positively impact average daily census, revenue growth, and greater adherence to evidence-based protocols, contributing to better financial health and resource allocation.
- **Seamless Integration:** The Equum Medical Tele-Hospitalist program is designed to be an extension of your existing healthcare team, providing gap coverage during holidays, weekends, and staff absences, ensuring that high-quality care continues unabated.

ADDRESSING COMMON CONCERNS

- **Quality of Care:** Equum Medical's Tele-Hospitalists possess the same qualifications as their in-person counterparts. They are adept at leveraging telehealth technology to deliver care that meets or exceeds traditional care standards.
- **Consistency of Care:** Our model ensures continuity by having a dedicated team of Tele-Hospitalists rotate coverage, allowing in-person clinicians to build relationships and rapport with their virtual counterparts.
- **Implementation and Integration:** Our team provides comprehensive onboarding and training, ensuring the Tele-Hospitalist Program is integrated smoothly into your hospital's existing workflows.
